

# FCE – SAMPLE ANSWER: REPORT

## Introduction

A good place that my college would recommend to the group of English students to visit is Port Aventura.

## The attraction:

Port Aventura is a place where all types of people can have fun and enjoy at the same time. It has a lot of roller coasters for the ones that want an exciting and adventurous experience and for the people that prefer quite places they have some theatres and different shows at all time, or even it's worth for the people that just want to see the place and have a walk around there. Moreover, you can find really good places to eat and some shops if you have money to spend.

## Why they would enjoy it:

I think that students would enjoy visiting it because after a long term with exams, homework and classes, it is very interesting for them to have a day enjoying with rollercoasters and spending time with their friends and schoolmates. In addition, they will like it because they are teenagers and Port Aventura is the perfect place to spend a different day doing something fun.

## Conclusion

In conclusion, I think that Port Aventura is a good place to go for the students because it will improve the relations with their schoolmates and it is the perfect place to spend a day having fun.

Scales	Mark	Commentary
Content	5	All content is relevant and the target reader would be fully informed. The report describes a location, explains what can be done there and why it would be suitable for a group of students.
Communicative Achievement	4	The report has been written using the conventions of the genre, for example headings and a concluding recommendation. The tone is objective and formal throughout. The report states straightforward facts and comments on them in a way which would effectively hold the reader's attention.
Organisation	4	The report is well organised and coherent, with particularly good use of headings which separate the main points. The text within the paragraphs is connected with a variety of linking words and cohesive devices.
Language	4	There is a range of task specific vocabulary used appropriately ( <i>a long term with exams; improve the relations</i> ). A range of simple and some more complex grammatical structures are used with control. There are some errors, ( <i>that prefers quite; it's worth for</i> ) but these do not impede.
